ACOUSTIC TREATMENT

Acoustic treatment panels are a simple yet highly effective solution for improving sound clarity in corporate offices and boardrooms.

[CLICK TO VIEW OUR SOLUTIONS](#)

[\\$ FROM \\$2,995+ GST](#)

Most modern boardrooms are equipped with video conferencing tools, microphones, speakers, and other AV equipment, but their hard, reflective surfaces—like glass, drywall, timber tables, and whiteboards—create significant acoustic challenges. These surfaces reflect sound waves, causing reverberation, echo, and poor speech intelligibility.

Acoustic panels work by absorbing sound rather than reflecting it, helping to reduce echo and control reverb times within the room. Allowing your team to focus with less distractions.

These panels can be strategically **placed on walls or ceilings**, and even suspended from the ceiling. Panels can be matched to the room's aesthetics, with a wide range of colours, textures, and shapes available.

Ultimately, properly installed acoustic treatment not only enhances the effectiveness of conferencing systems but also improves the comfort, focus, and productivity of everyone using the space.

WHAT OUR CUSTOMERS HAVE TO SAY ABOUT OUR SUPPORT

Marco Antonio Parra – PeopleKind Group

I recently had the opportunity to work with 3 Monkeys Audiovisual for a project involving the upgrade of several meeting rooms' audiovisual systems, and I must say that their professionalism and exceptional customer service truly stood out.

Throughout the project, the team at 3 Monkeys AV demonstrated a deep understanding of our needs and provided expert recommendations on how we could improve the audiovisual systems in our meeting rooms. They were patient and responsive to all of our inquiries and provided regular updates on the project's progress.

What impressed me the most was their attention to detail and willingness to go above and beyond to ensure that the upgrades were completed on time and within budget. The team arrived early, well-prepared and executed flawlessly, causing minimal disruption to our daily operations.

Moreover, their follow-up support has been exemplary, with prompt responses to any issues we have had since the upgrade. Overall, I highly recommend 3 Monkeys for any audiovisual needs. Their professionalism, expertise, and exceptional customer service make them a top choice for anyone seeking outstanding audiovisual solutions.

Thank you Francis, Kyle, Barry, and the rest of the team for your exceptional work and dedication.

Maria Macian-Dagino (Rockingham Senior High School)

We're really happy with everything that 3MAV has done for us over the years.

The performance and quality of their systems are excellent. 3MAV staff are always happy to help us whenever we need after sales support or advice.

They have a huge range of products, which is great for us, as we keep buying new products and upgrading our old ones. 3MAV are very professional and great to deal with.

Phillip Anderson (Department of Sports & Recreation)

The systems are fantastic, they work very well and we've barely had any issues with any of them. I was very satisfied with both the quality and performance of the systems. The service we received from 3MAV was absolutely awesome! I think the systems were great value for money.

The people from 3MAV that we dealt with were very professional and provided awesome service. They came in, did what they needed to do and cleaned up after themselves before they left which was great.

The range of products offered is quite large. We are always given different options for the jobs that we need which is great. Dealing with 3MAV was a very enjoyable experience. They provided the right equipment that we needed with no fuss and at a great cost.

Tania James (Our Lady of Mercy)

The systems are very efficient; once they were installed the teachers were able to get on them straight away. The large whiteboard screen is so much better than the old IWB that we had. All the systems are super easy to use so the teachers were able to adapt their lessons and get on with it straight away.

We had excellent service, expertise and follow up support from 3MAV which is why we keep coming back. We are always well looked after and nothing is too big a problem. Even if we call 100 times a day, 3MAV are always happy to help us.

We have found everything from 3MAV to be very good value for money. The 3MAV people are highly professional and a pleasure to deal with. 3MAV have a vast range of products available and we were able to find everything that suited our school and classrooms without having to go elsewhere which was great. Dealing with 3MAV is always easy and we are very happy.
